ABOUT US

Guild Home Improvements, headquartered in Carshalton, Surrey is one of the most established and successful home improvement businesses servicing South London, Surrey, Sussex and surrounding areas. As a family owned business we offer traditional values and a personal service that many larger firms often forget. We pride ourselves on our professional attitude and offer a free quotation service with one of our knowledgeable window and door specialists, who can help guide you throughout your home improvement project. Our highly trained in-house fitting teams have been employed by us for a number of years to provide a quality installation service with minimal disruption and inconvenience.

We have been established since 2002 and in that time we have grown from strength to strength into the successful, thriving company we are today.

All work is fully insured so you can be confident that you are in safe hands, from the beginning of your installation throughout to completion.

We promise bespoke solutions for all your requirements and every customer is important to us. We cater for all residential and commercial clients providing each and every one with outstanding service irrespective of order size or value. Our enviable reputation has developed due to our outstanding service, customer commitment and project perfection, at all times. The majority of our work comes from satisfied customers on a repeat business or a recommendation basis and we are approved members of Checkatrade the directory of recommended and trusted tradesmen and organisations who are regularly monitored to meet their high standards of trading and workmanship.

Our stunning show centres are located in Epsom and Weybridge, Surrey, showcasing a wide range of high quality solutions from leading manufacturers that include; The Residence Collection, REHAU, Origin, AluK, Solidor and Endurance.

Our extensive portfolio includes PVCu windows, doors and vertical sash sliders, timber-alternative windows and doors, aluminium windows and doors, traditional timber windows and doors, a wide range of composite doors, patio doors, French doors, bi-folds, porches and orangeries, plus much more!

Every customer will receive the highest quality products, a first class installation and value for money from a company that cares about its customers.

WINDOWS

GHI's REHAU PVCu casement windows come in a wide range of different window styles, suitable for all types of buildings providing exceptional levels of energy efficiency and aesthetics. REHAU is world renowned for its quality and gloss finish, designed to deliver a long-lasting appearance and reduce maintenance. At GHI we offer an exceptional locking upgrade as standard to our REHAU windows and the bonus of an exclusive finishing touch meaning our window casements are unrivalled in both style and security. All glass units are filled with non toxic argon gas. This delays both heat and sound passing through the window for superior insulation.

The REHAU TOTAL 70 offers a wide choice of styles and colour finishes which will fulfil the needs of a variety of applications in both new build and refurbishment projects.

Casement windows are the most popular style of replacement window in the UK. It is an extremely versatile window that will suit most homes wherever the location.

Featuring fixed panes, top opening fanlights and side opening lights, casement windows can be combined to create an almost limitless range of styles, whilst providing the benefit of noise reduction, low maintenance, safety and security and energy efficiency. All of our REHAU window systems can achieve an A rating, the highest possible window energy score. With many additional features such as decorative glass, astragal bars, Georgian inserts and woodgrain foils, casement windows can be tailored to your specific requirements and are available to view in our stunning show centres.

PVCu CASEMENT

DID YOU
KNOW?

What's more our casement windows from REHAU can accommodate the very latest high-performance handles, hinges and locking mechanisms making your home safe and secure.

PVCu features;

- German engineered brand
- Extremely slim sight lines and enhanced aesthetic appeal
- Internally glazed
- Tilt and turn option
- Choice of an equal sight line finish
- Easy clean egress hinges
- Non-degradable Q-Lon gasket
- Sculptured profile also available
- Selection of different hardware
- Unrivalled 12 point locking system
- Internal steel reinforcement to the frame

PVCu needs very little attention and a wipe with a damp cloth is the most maintenance you will most likely ever need to do. An additional benefit of high quality PVCu windows is the incredible increase in sound insulation gained. If you live on or near a busy road or any other source of noise pollution, fitting GHI's PVCu windows could genuinely improve the sound quality in your home. You can also enjoy improved energy saving as PVCu is extremely good at keeping the heat in and the cold out. Upgrading to PVCu double glazed windows certainly helps to deliver a more enjoyable, energy efficient, home.

REHAU PVCu SASH

Give your home a new lease of life with GHI's REHAU Heritage system stylishly designed to replicate the slim sight lines and traditional styling details of timber sash windows found throughout the UK

Modern PVCu technology brings authenticity without the compromise of sacrificing either style or efficiency. Extremely low maintenance PVCu is a very tough material that will hold up even in the most extreme conditions and it's this resilience that also makes it one of the most secure frames within the industry.

When it comes to replacement sash windows it is important to try and retain the authenticity and character that original sashes bring to your home whether it be Victorian, Georgian or Edwardian. At GHI we only use the most distinctive and authentic sash windows available in the UK market, enabling you to transform your home with traditional style PVCu or timber sash windows, designed to deliver exceptional performance without compromising on the look and charm.

PVCu SASHES

Our REHAU Heritage vertical sliding window system has been developed extensively under conservation bodies and expertly crafted, enabling homeowners to retain traditional design details

and sight lines of a timber box sash window, with all the benefits of low maintenance PVCu.

As standard we offer a full box sash removal service with rockwool insulation. All architraves and liners are replaced on a like for like basis.

REHAU sash features;

- Run-through, authentic Heritage style horn
- Available with full mechanical joints
- Putty line aesthetics to really retain character
- Deep bottom rail to replicate traditional timber joining
- Optional polished welds
- Optional woodgrain finishes available
- 'A+' rating as standard
- Authentic surface mounted astragal bars in a range of different period designs
- Traditional globe claw furniture in gold, chrome, satin, antique black and white
- Tilt facility for easy clean

By selecting the REHAU vertical sash we are able to offer the perfect result. A classic, timeless look, similar to genuine timber, yet the most energy efficient low maintenance window.

HERITAGE 75

Heritage 75 is part of the Residence 7 window system and is a new 75mm deep window designed to replicate the 19th century flush sash timber window. Its stylish, versatile appearance can be used for both contemporary new builds and traditional British homes. Designed and made in Britain, the beautiful flush sash exterior and interior create a modern chic appearance. All glass sight lines are perfectly equal to provide symmetry to your designs. Heritage 75 can accommodate 28mm double or 44mm triple glazing and delivers market leading thermal and acoustic performance and thanks to its robust design it has achieved one of the highest classifications on weather testing. Manufactured from a modern composite material to give a virtually maintenance free finish, the Residence 7 window system follows on from the Residence 9 system, but features 7 chambers and is 75mm thick. Residence 7 is truly a luxury, high-end window system that can also be incorporated into orangeries and garden rooms. Choose from a range of different glazing beads such as decorative, staff or square options to create your desired look.

Heritage 75 embraces a modern weld technique, creating a contemporary appearance. This method fuses the joints together diagonally to incorporate a visible seam. There are also a range of different finishes available to fully enhance your windows such as monkey tail handles or pear drop hardware. Opt for an authentic Radlington cill, the most modern interpretation of timber cills to accompany your residence windows and doors.

Heritage 75 benefits;

- Flush external sash
- 75mm frame depth
- Robust, lock and hinge retention mechanism
- Flush internal sash
- Glazing bead style to suit 28mm double or 44mm triple glazing
- 28mm or 44mm triple glazed Low E sealed units
- 7 chambered system for exceptional thermal performance (a typical window usually only offers 3 or 5)
- Easy clean rebates
- Produced by the market leading brand 'The Residence Collection'

HERITAGE 100

Flush timber alternative windows and French doors from GHI, the fully authorised leading UK installer

Heritage 100 is part of the Residence 9 window system and will look great in any location thanks to its historical design and considered conservation guidelines which authentically replicates the traditional timber sightlines. Full mechanical joints, traditional furniture, dummy butt hinges and a weather bar drip rail make Heritage 100 the most authentic timber alternative window on the market.

Designed and made in the UK, Heritage 100 is crafted with the endearing designs of British architecture in mind and boasts many bespoke options that can satisfy a range of homes from the grandeur of stately homes to the solid good looks of Georgian, Victorian and Edwardian, right through to contemporary homes.

The thermally efficient 9 chamber design and modern glazing ensure optimum thermal performance. Heritage 100 can be truly bespoke, make your windows and doors truly individual by selecting dual colours and hardware design, whether contemporary or period there is a style to suit every property. **The popular brilliant white woodgrain finish from GHI goes hand in hand with our exclusive finishing touch to complement the overall appearance.**

Solutions for planners and homeowners in conservation areas

Heritage 100 extracts the key principles, shapes and dimensions from the Article 4 Conservation Area guidelines for windows and integrates market leading technology into the design using virtually maintenance free materials. Residence 9 is thermally and acoustically brilliant. It features the latest security, maintenance and performance innovations, whilst appearing traditional. Your windows and doors won't warp, swell, flake or need sanding and painting.

Authenticity and energy efficiency

Heritage 100 has 9 chambers and is 100mm wide, resulting in superior thermal, acoustic, strength and security performance. It achieves a certified window energy A+ rating and accommodates the most thermally and acoustically efficient 44mm triple glazing and 28mm double glazing. Attaining U-values of 0.8 with triple glazing, Passivhaus Standard and 1.2 with double glazing far surpassing the British Building Regulation requirements. All of this contributes to lower energy bills, keeping you cosy in the winter and cool in the summer.

Certified A+ energy rating and authentic hand finished detailing

R9 benefits;

- 9 chamber system
- Hand finished and undeniably authentic
- 100mm frame depth
- Sculpted interior finish
- Entirely versatile to complement any property style
- Fully foiled, easy clean rebate to match the chosen internal colour of your windows
- Working pegs and stays (as opposed to dummy)

ALUMINIUM

Let the light flood into your home with our stylish slimline aluminium windows. At GHI, we understand that with real modern living it is crucial to provide a window that not only looks aesthetically pleasing but also offers the highest acoustic and thermal performance combined with maximum security.

AluK is the market leader in the design and manufacture of aluminium windows. Renowned for its strength and durability within the industry, aluminium offers a long-lasting, low maintenance solution for the homeowner. With the benefit of narrow window profiles and slim sight lines AluK can make a real difference to the look of your property.

- AluK windows are made using the most sustainable materials. Boasting ultra slimline profiles that are lightweight and strong, ensuring we are able to offer a window like no other. Our 45mm sash complements any home when compared to our competitors who use a 52-57mm sash
- Choose an optional, innovative, upgrade of an internally glazed window profile combining enhanced security and aesthetics. This also eliminates the need for scaffolding
- Unrivalled thermal efficiency, exceeding current building regulations
- Available in a range of different profiles such as Ovolo, chamfered or contemporary
- With today's modern aluminium frames GHI is able to provide a window with a deep thermal break, creating a heat barrier that reduces the formation of condensation and cold draughts. Trickle vents can also be added to improve ventilation

- Our highly secure locking system offers an added secondary, lockable night vent facility. With the strength of our aluminium combined with our superb locking system our windows are designed to exceed all expectations
- Glazing options include, Georgian style bars, decorative glass or lead designs
- Accessorise your windows with our range of ornate, character hardware which not only looks great but offers high durability
- Choose from a wide selection of powder coated RAL colours
- Opt for single or dual aspect – our dual colour option enables you to seamlessly colour match your home, inside and out
- Ideal for Crittal replacement, our aluminium is designed to closely match the slim sight lines of steel windows

Our aluminium windows have been designed to provide you with the flexibility to create the perfect look that will complement your home and lifestyle.

TIMBER WINDOWS

Mix period elegance and style with modern technology

Our high-quality factory finished timber windows, made from hardwood or VAC-VAC treated engineered softwood, are available in a wide range of colours and stain finishes to suit any home. Choose from one of two manufactured hardwoods such as Red Grandis or African Sapele, world renowned in the industry for their resistance and durability. Our timber windows are sanded by hand and fully prepared before each stage of the paint process which involves dipping the frames in an antifungicidal base coat of paint and finished with two spray coats in the colour of your choice. Colours can be matched to any sample provided, you can even have a different internal and external colour.

There are many different timber window options to choose from and all our timber windows can be manufactured fully bespoke to suit any situation, including listed buildings.

We offer two choices of frame depth, 69mm and 90mm. All of our flush and storm proof windows have multi-point locking systems as standard. Modern design accommodates shootbolt handles, multi-point shootbolt locking mechanisms for added security and easy glide, stainless steel, friction hinges to facilitate ease of opening and cleaning.

Noise, weather and draughts can all be kept at bay by full double glazing and weather seal systems. Our double glazed units in either 28mm for storm proof systems and 24mm in all other systems, deliver optimum thermal performance in your home.

8 YEAR PAINT
GUARANTEE –
SPRAY TO ANY RAL
COLOUR

- Stormproof timber windows, made to virtually any shape or size, available in two choices of frame 69mm and 90mm
- Traditional flush timber windows available in two choices of frame 69mm and 90mm
- Stepped flush timber windows available in a 90mm frame

Thanks to our sustainable timber purchasing and forest certification our customers can rest assured that we are taking care of the environment. Our traditional timber window ranges are also compliant with building regulations.

Why not personalise your timber windows with Romatopola handles!

Personalise your timber windows with bespoke butt hinges, dummy or working and a choice of handles and stays, in a range of colour options. GHI's hardware styles enable you to replace your windows without losing the character appearance, but also gives you the chance to opt for something more modern. The variety of style and colour options will enhance the appearance of your property, whether it's contemporary or period.

- Available in a range of nine exclusive finishes, Romatopola hardware is both attractive and practical

UP TO 30
YEAR FRAME
GUARANTEE
AGAINST ROTTING
AND WARPING

TIMBER SASHES

For unmistakable charm and character we offer a fully bespoke, timber sash replacement service as standard. This includes full box sash removal, removing any existing joinery inside the opening and insulating the area with rockwool. The architraves and liners are replaced on a like for like basis with either PVCu or wood.

With traditional, British architecture in mind, GHI have ensured that only the most accomplished craftsman within the UK are entrusted with manufacturing our wide range of timber windows and doors.

Combining traditional methods with modern technology they are able to deliver a window like no other, a sash that is authentic in appearance but skillfully crafted making it extremely practical for the homeowner.

- Choose from manufactured hardwood such as Red Grandis or African Sapele renowned in the industry for its superior qualities and high durability or opt for engineered softwood
- All timber is carefully selected by a technician who inspects it for; colour, quantity, integrity and checks it is the correct moisture before it goes into its manufacturing process
- Once the sashes are assembled they are carefully hand sanded and inspected to ensure they are ready for the finishing process
- All softwood sashes are given a VAC-VAC treatment as standard. This process extends the lifespan of the timber by using a low-pressure vacuum to remove any water from the sash as opposed to natural drying. It protects the wood from fungal and insect attack resulting in us being able to offer a 30-year guarantee
- The sashes are then immersed in an anti fungicidal base coat
- Softwood sashes then go back in the vacuum
- They are lightly sanded and then are sprayed with the colour of your choice

- The timber is again lightly sanded by hand and a second coat of microporous paint is applied at 150 microns thick. It is essential that the paint is this thick to help the long-term durability of the product. A paint brush can only achieve 50 microns of thickness
- An optional VAC-VAC upgrade is available on hardwood
- Customise your sash windows to offer a conventional 50/50 split or an offset of 70/30
- Any waste timber created by the manufacturing process, such as shavings or saw dust, is converted to firewood which is then used to heat the factory

Our timber products are available in either FSC and MTCC certified hardwood or FSC certified softwood, so you can be assured the timber is not logged from illegal sources and originates from a properly managed forest. All sash windows at GHI come in two different operating designs;

Spiral balance

- This method is based on traditional weights and pulleys, extremely similar yet more affordable. They feature all the beauty of traditional sash furniture such as fitch fasteners, sash pulls and sash lifts but the vertical sliding action is achieved by a spring that is weighted to the sash. This delivers a smooth operation.

Weights and pulleys system

- This particular operating system dates back to the 17th century. The window operates via a weight that is located in a box section of the outer frame of the window. The weights are connected via a cord, over a wheeled pulley creating the smoothest operation and aesthetically projects a great period look.

The quality of our materials are paramount to our high standards. Whether traditional timber or PVCu, our market leading products really will give your home the most aesthetic look with all year round performance.

DOORS

ENTRANCE DOORS

GHI's entry-level foam composite door from Door-Stop is available in thirteen different colours including nine frame shades enabling you to colour match your home effortlessly. Measuring in at 44mm (compared to conventional PVCu panel doors at 28mm), each door is super-strong and designed to withstand the harshest of weather conditions. Thanks to its robust structural frame and glass reinforced plastic finish, you'll feel safe and secure, day and night. You can even configure your composite door with gold, chrome, black white and contemporary hardware to complete the look. There is also a wide range of decorative and

obscure glazing options. To make the door incredibly strong, the lock edge is fitted with a full length of 4mm thick, powder coated aluminium lock strip ensuring your preferred lock sits flush inside your door. All locking mechanisms are anti-bump and anti-snap as standard. With over forty-six different designs there is a door for every home and thanks to its ten year guarantee it's one of the most comprehensive, affordable, composite doors on the market.

GHI Is Part Of The Endurance Preferred Installer Network

**Protect your home
with a solid and secure
door by Endurance!**

Guild Home Improvements is extremely proud to supply a popular brand renowned for its strength and security without compromising on style and hardware options. Choose from eighteen different dual colour combinations, including Duck Egg Blue, and fifteen different frame colours enabling you to colour match your home inside and out. With over seventy designs and options including handle-less lock technology you really can create a future-proof door to suit your style and budget. Endurance doors are made up of seventeen engineered timber laminates and it's this approach that makes the Endurance composite door the most secure on the market. Its 48mm thick cross laminated LVL timber door leaf offers lateral strength and stability, a high security multi-point locking system, tested to the PAS 24 security standard, and an anti-pick, drill and bump six-pin euro cylinder ensures additional security providing complete peace of mind.

ENDURANCE
PREFERRED INSTALLER

Not only are Endurance doors 10% thicker than any other composite door but the finish is far superior to anything else on the market. Every door is manufactured with an integrated moisture barrier system at the bottom of the door leaf to stop water ingress. There is also a huge selection of hardware options including a heritage thumbturn and finger pull system. If you're looking for modern design Endurance also have a contemporary stainless-steel pull handle as part of their stunning Urban Collection. If it's a more period look you're after the stylish Walton door can give your home a truly traditional 1930's feel together with a range of matching hardware options. From stable doors, double doors to back doors GHI's fabulous Endurance range has a door style for every home. Call for a full Endurance product catalogue or visit our website.

GHI WINDOWS: 0800 731 4582

TIMBER DOORS

Tailor-made to your exact requirements

At GHI we offer a wide range of high-quality, period and contemporary hardwood timber doors for external use.

All our timber doors are manufactured from hardwood in either Red Grandis or African Sapele, world renowned in the industry for their resistance and durability.

Go for an authentic stable door, contemporary design or the ever so popular London look. Whichever style you choose every door is robust, colour co-ordinated to the door threshold and finished with multi-point locking mechanisms including hook bolts and dead locks.

Add instant curb appeal and give your home that wow factor! All doors are fully bespoke and come with a comprehensive selection of different glazing options; from decorative leaded designs to simple obscure glass. Choose from single-side or double side panels, either full height or partial height, as required and made to measure in any size to create a stunning entrance to your home.

Couple your chosen door with an extensive variety of ironmongery including letterplates, numbers, door knockers, door knobs, spyholes as well as specialist locks.

Timber front doors can be sprayed to any RAL colour to help tie in with existing shades in your home. Factory applied micro-porous paint coatings are used to prolong the life of the wood. Opt for an internal white finish and an external grey, there are endless possibilities.

PORCHES & BACK DOORS

Porches can help increase your homes energy efficiency and add extra security especially with our multi-point locking system. Choose from either side panels, glazed panels, or brick-built options to achieve a distinctive entrance. Select different glazing options such as leaded designs, obscure glass or perhaps go for a different colour, the choice is yours. Available in both PVCu and aluminium, GHI's porches look fantastic when teamed with one of our many entrance doors. A porch can add a delightful look to your home and provide additional space and warmth. GHI porches are constructed to the highest standards using the finest materials and only fitted by our in-house team of builders and roofers.

Whether you desire a small space to put your shoes on or a small expansion to your entrance for storage, we can help you create the perfect addition to your home. All our porches are bespoke and made-to-measure to really complement your desired look.

Back Doors

We offer a broad range of PVCu and aluminium front and back doors. Our popular REHAU PVCu 70mm door styles range from traditional to more contemporary looks with a number of finishes and glazing options. They are also maintenance free and offer a low-level threshold option ensuring smooth access at all times, particularly for wheelchair access and comply with the latest building regulations. If it's a modern look that you're after then our range of stylish AluK aluminium front and back doors are the perfect solution, delivering optimum thermal performance, coupled with maximum security thanks to our highly secure locking system. Choose from a wide selection of powder coated RAL colours to create the perfect look for any home.

GHI also supply and fit high-quality timber back doors, the perfect companion for any traditional home or listed building. Choose from hardwood or VAC-VAC treated European softwood and a variety of styles and colour options.

DID YOU KNOW?

FRENCH DOORS

**Certified A+
energy rating and
authentic hand
finished detailing**

GHI's French doors are the perfect fit for any type of home and deliver the very latest in technology, combining high acoustic and thermal performance with maximum security for complete peace of mind.

Choose from PVCu, aluminium, our stunning Residence Collection timber-alternative or timber; all available in a number of colours to suit any style of home. A wide selection of paint and stained finishes further enables you to fully customize the look and feel of your French doors and seamlessly match the existing interior and exterior of your home. Toughened safety glass, hook-bolts and our anti-bump, anti-snap, multi-point locking system, guarantees all round security protecting against all acts of crime, including picking, drilling and bumping.

Our REHAU PVCu French doors are a great, low cost alternative to conventional sliding patio doors. They are also extremely low maintenance and a quick wipe with a cloth makes them look like new. Available in popular traditional white we also offer a variety of colours including light oak, woodgrain rosewood finish and dual colour options to enable effortless colour co-ordination in any style of home.

Our stylish aluminium doors come in a wide variety of powder coated RAL paints, available in a huge range of colours that includes; realistic wood structure and metallic paint options and dual colour options to match your home both inside and out. Our market leading Origin French doors are one of the most timeless and sought-after renovation solutions and are the perfect match with our versatile Origin bi-folds. Alternatively opt for our AluK French doors, fully bespoke from the configuration of the doors to the handles, accessories and colour.

Our beautiful Residence Collection timber-alternative French doors will look great in any location thanks to their flush exterior and considered conservation guidelines. Traditional dummy butt hinges and give the door a true and authentic profile. Our Residence Collection French doors are the most authentic timber-alternative doors available and have a much shorter production lead time than traditional timber doors.

The Residence Collection is designed and made in the UK and is crafted with the endearing designs of British architecture in mind; boasting many bespoke options that can satisfy a range of different homes.

The thermally efficient 7 or 9 chamber design and modern glazing ensure optimum thermal performance. Residence Collection French doors can be truly bespoke, make yours individual by selecting dual colour options and hardware designs; whether contemporary or period there is a style to suit every home.

Create a statement with a range of luxury colour finishes such as Clotted Cream or the highly favoured Painswick.

With the increasing demands of modern living your need your windows and doors to look their best with minimum effort, therefore, the tedious tasks of sanding, staining and painting will be replaced with a quick wipe down, leaving you more time to do the things you love!

Residence 7 and 9 French doors are also thermally and acoustically brilliant accommodating full double glazed panes contributing to lower energy bills, keeping you cosy in the winter and cool in the summer.

GHI's timber French doors are of the highest quality FSC and MTCC certified hardwood timber and with the addition of parliament or projection hinges each door can open to 180 degrees or be flat against the walls either side, maximising on light entering the room. Our timber doors are the eco-friendly choice and bring natural warmth and light to any style of home. Our British based manufacturers have a team of dedicated craftsman who have years of experience in timber manufacturing. Combining traditional methods with modern technology they are able to deliver a French door like no other, one that is skillfully crafted making it extremely practical for homeowners. Our customers can also rest assured that with our sustainable timber purchasing and forest certification we are taking care of the environment. We also offer bespoke timber bi-folding doors, making spans of up to 5.5m possible as standard. A room can be transformed when fully open to create an extra visual space. The smooth operation of the doors and easy-to-operate locking system make these doors a pleasure to use.

PATIO SLIDERS

PVCu and aluminium sliding doors are the perfect alternative to bi-folding or French doors and thanks to having less vertical panels can also deliver more light into your home. Our multi-point locking system ensures great security protecting against all acts of crime, including picking, drilling and bumping. Our sliding doors come in a variety of sizes and panel combinations, and we offer a choice of tracking systems enabling you to enjoy wonderful, uninterrupted views from the comfort of your home.

Our PVCu doors deliver classic looks coupled with a maximum glass area designed to optimize visibility. They are the perfect affordable choice for conservatories, balconies, porches or extensions. Enjoy all the benefits of modern PVCu including noise reduction, safety and security and energy efficiency. They are extremely easy to maintain and look great on any style of home. Our PVCu sliding patio doors are available in a wide range of options with a choice of two, three or four panes and come complete with the latest high-performance handles and locking mechanisms. Our PVCu patio doors are also available in a complete range of colours and finishes.

Our aluminium sliding patio doors are from AluK, a leading manufacturer of high quality, slimline doors that are extremely strong, robust and incredibly difficult to break, bend or smash. Quality lock components standard with every door design deliver the highest security protection for your home. Enjoy multiple opening options and a choice of threshold aluminium profiles.

They can be powder coated in a wide range of RAL shades enabling you to effortlessly co-ordinate your existing colour schemes with

your new doors. If you have a sample colour then we will also do our best to match it!

- Narrowest frame design - only 70mm - ideal for replacement doors
- Two pane sliding door or window
- Full range of complementary handles and security features
- Robust and reliable sliding and locking mechanism
- Single or dual colour options in a wide range of colours
- Multi-point locking mechanism
- Can easily be combined with all AluK window and door systems

BI-FOLDS

GHI's stunning range of bi-fold doors are perfect for any home or location. Our aluminum profiles are strong, durable and require very minimal maintenance, guaranteeing total reliability and performance over a lifetime of use

Visofold 1000 slide-folding doors are made in the UK and feature a choice of internally or externally folding panels that help to integrate your homes external and internal living spaces, delivering uninterrupted landscape views. They are the perfect alternative to sliding doors and ideal for opening up an entire wall or part of a conservatory. GHI's Visofold doors also offer a choice of opening configurations to suit any application and style of home. Fold the sashes internally or externally, place the opening at the side, at one end, or create a single entrance door for easy access, or in the middle to give the option of a double door; the combinations are endless. With internal glazing beads preventing the removal of glass from outside and high-security locking mechanisms in the handle, our doors are extremely hard wearing.

All Visofold profiles feature a polyamide thermal break that enhances the thermal performance and improves the overall U-Value. Profiles feature

EPDM high quality gaskets and weather brushes to aid weather resistance. Security is assured by multi-point lock mechanisms on main opening sashes and shoot-bolt locking on floating mullions. All doors have the option of either low thresholds for unimpeded easy access or rebated thresholds that offer improved weather resistance. Visofold doors are available in a choice of standard or non-standard colours, including metallic, wood-structure, dual colour and Smart's unique Sensations range of textured finishes.

- Attractive, ultra slim-line profiles offer reduced sightlines due to smart 65mm sash
- Profiles available in either square or rounded edge options
- Fabricated using mitred corners
- Lock mechanism available with domestic style 'lift-up' handle and an adjustable, one-piece keep
- Kitemarked and security-tested to the PAS24 standard

GHI's aluminium bi-folds from Origin, the UK's leading door manufacturer, a beautifully crafted system made from premium grade aluminium. These beautifully designed versatile, lightweight, aluminium doors look stunning in any setting and can instantly transform any style of home. Every door delivers a smooth running free-glide system providing effortless closing. Its no boundaries threshold option ensures smooth uninterrupted access.

Advanced weather tight colour co-ordinated seals combined with thermal efficiency guarantee optimum thermal performance every time. You can colour match doors to your home and existing colour schemes thanks to a wide range of powder coated RAL colours. If you have a sample colour then we will also do our best match to match it!

An Origin door is one of the most timeless and sought after renovation solutions and thanks to its bespoke nature it offers complete versatility and complements any dwelling from a new or existing build, an extension or even a period style property.

- Free glide system – intelligently engineered short wheelbase carriage assembly with six wheels
- Over one hundred and fifty different RAL shades to choose from in matt, satin, gloss and authentic woodgrain finish options
- Dual colour option – colour match your home inside and out
- Choose from one to eight door sets and door leaves as narrow as 400mm or as wide as 1200mm
- Selection of elegant, stainless steel and aluminium handles including slave and D-handle specifically designed by Origin to withstand a pull of 1600 Newtons and available in any one of 150 RAL shades
- Unique 8 point locking system that conforms to all the latest security standards including PAS 23/24
- Engineered to optimise superior weather rating, security and aesthetic appeal – certified U-Value 1.32
- Unrivalled Q-Lon gasket
- Couple your bi-folding doors with Origin windows to complement the overall finish

ROOF LANTERNS & TRIMS

ROOF LANTERNS

GHI Windows offer a wide selection of different rooflights and lanterns to suit any property style

Our Atlas roof system has a unique design offering exceptional benefits like no other roof system on the market. Its sleek frames boast ultra slim lines with minimal bar intrusion, eliminating the use of chunky profiles which can often obstruct the glass area. The roof is made up of strong, light, 40mm aluminium frame rafters to help create an elegant roof profile that really maximises the use of light and space within your home. Atlas slashes the visible width and sight lines of rafters by 30% and the main internal feature ridge by 70%. The use of low sight lines ensures a large glazed roof structure that won't over dominate your home. Using slimline technology with outstanding strength, the aluminium rafters have removed the need for outdated bulky hood covers on lantern roofs (unless it's Victorian style). As standard the Atlas roof glass combines heat reflection and thermal insulation with reduced traffic noise and rainfall. The units incorporate argon gas to improve the insulation

and are finished with a warm edge spacer bar to reduce the risk of condensation. The aluminium can be coated in any RAL colour using the most up to date powder coating process, you can also choose to have one colour on the outside and a different one on the inside enabling you to effortlessly create the most versatile roof to fit perfectly in your home.

Key benefits;

- Ultra-low sight lines
- Live load calculations are increased by 33% in comparison to any competitor
- Comfortable all year-round room use
- The Atlas rafter is twice as thermally efficient
- Self-cleaning glass as standard
- Low-E and solar control coating to control the amount of visible light, UV and heat that passes through the unit meaning the rays are reduced by 94%
- Choose from a selection of different designs such as flat roof, sky room, pyramid or contemporary styles

ROOFTRIMS

Low maintenance, durable and weather resistant!

Roofline Services

At GHI we specialise in the replacement of fascias, soffits and guttering across Surrey, South London and surrounding areas.

All made to measure, our roofline services can enhance the exterior of your home as well as offer durability and weatherproofing from the outdoor elements. Installed by our experienced in-house fitting teams providing unrivalled workmanship for real peace of mind.

All our rooftrims are made from durable PVCu, therefore, low maintenance removing any need for climbing up ladders, but highly effective, installed with a special ventilation system to protect your roof and walls from water and damp. Available in a range of colours

Fascias

Your fascias and bargeboards are probably the most noticeable feature of any of the rooftrim range. They are not only aesthetically pleasing but have a hugely important role to play in protecting your roof. GHI's fascias perfectly conceal and protect the ends of your roof rafters, giving your roof a crisp, clean appearance with no unsightly gaps or holes

Soffits

Our PVCu soffits are designed to bridge the gap between your homes siding and roof edge, they are responsible for protecting the underside of the roof overhang, whilst completing the overall look of your property

Durable and made-to-measure for an exact fit our soffits will look clean and attractive for years to come, being low maintenance means no more climbing ladders to repaint every year

Guttering

GHI understands blocked or leaky gutters can be costly to repair, the damage they can cause to your home can be substantial. That's why our PVCu guttering is expertly designed to protect your property from even the heaviest weather.

Available in three profiles, square, half-round and ogee

Downpipes

An effective rainwater drainage system is imperative in the protection of your property. Installing quality downpipes channels rainwater away from the property and safely drains it away. GHI can supply square or round downpipes to suit any style of property. We can create a cast-iron effect which is ideal for the more traditional homes and we also have contemporary colours perfect for today's modern properties

Bargeboards

Bargeboards are a strong decorative board located at the gable end of the roof, they are designed to both protect and conceal the roof timbers of your

home. Our bargeboards will keep your roof lining dry and damp free, with a smooth clean appearance and no unsightly gaps or holes. Our bargeboards are made up to 25mm thick for increased durability, and we only use stainless steel pins and nails with polymer caps to ensure no rust stains appear.

They are available in a choice of five colours – white, mahogany, golden oak, rosewood and ebony – to complement any style of home from traditional to modern. Even the smallest details have been thought out so our pin-heads are colour-matched making them barely visible

Cladding

PVCu cladding can enhance and refresh the appearance of your home.

It provides an attractive, low-maintenance and weather-resistant solution for replacing rotten timber cladding, concealing problem areas of brickwork. However, if weather damage causes cladding to rot, the effect it leaves is far less attractive. That's why GHI's cladding has been designed to be exceptionally durable, attractive and resistant to even the worst weather.

All our of cladding comes in a wide range of different finishes to colour match your home effortlessly

The image shows a bright, modern conservatory with a large, multi-paned glass roof. The interior is furnished with a dark wooden dining table, two upholstered armchairs, and a sofa. Large windows on the side walls offer a view of a green garden. A chandelier hangs from the center of the glass roof. In the foreground, there are white lilies.

CONSERVATORIES & ORANGERIES

CONSERVATORIES & ORANGERIES

Both conservatories and orangeries have evolved over time to add extra space to the home creating the perfect room to overlook a garden.

They are similar in that they both feature glass roofs and a large glass space to allow lots of natural light in, but while a conservatory is mostly made up of windows and frame, orangeries use a combination of brick pillars, glass doors and a roof lantern to become a real part of the home rather than just an extension.

In today's modern space people are turning to orangeries not only to add value to their home but to create that luxurious inside, outside feeling. The additional space an orangery creates in your home is perfect for entertaining and if the weather is rather unpredictable, within seconds, you can be seamlessly slide shut the stylish bi-fold doors and finish off your entertaining inside, in comfort. An orangery is a fantastic extension to your home where traditional features meet real modern living.

The orangery originated from the Renaissance gardens of Italy, when glass-making technology enabled sufficient expanses of clear glass to be produced. They date back to the seventeenth century, however, the glazed roof which afforded sunlight to plants that were not dormant, was a development of the early nineteenth century. Orangeries were used to protect orange and fruit trees from the winter months in luxurious residences then when fruit became more reasonable to buy they were then used to store decorative plants and seen as a perfect garden room creating a symbol of status.

Whilst their sense of luxury still remains, they are now ideally used as a room to entertain or dine. The grand, interior height of an orangery and the supreme aerial views achieved with the roof lantern flood adjoining rooms with light creating a stylish ambience. An orangery can complement different architectural styles more easily than a conservatory so they are often used for a dining area as they offer more privacy.

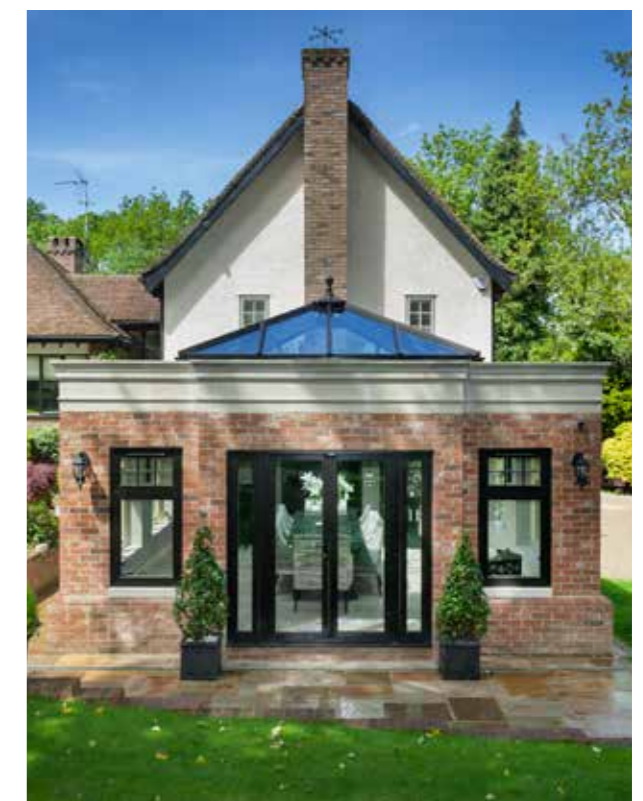

GHI WINDOWS: 0800 731 4582

With industry leading thermal performance, the modern orangery makes a great versatile room. It offers the shade in the summer and the extra warmth in the winter making it a perfect all year round space!

Both conservatories and orangeries are exceptionally durable and require minimum maintenance. High specification security locks, sound proofing and thermal efficiency give you a real sense of security and complete peace of mind.

GHI's in-house building teams and total project management team will ensure a smooth and seamless installation from the beginning right through to the completion of the project. Speak to one of our advisor today to find out more.

GHI WINDOWS: 0800 731 4582

WHY USE GHI WINDOWS

GHI is the most successful home improvement business servicing South London, Surrey, Sussex and surrounding areas

- **Established in 2002**

GHI is a family owned business with traditional values and a professional attitude, at all times. Since our inception we've gone on to help thousands of homeowners enjoy improved energy efficiency and added-value to their homes

- **Outstanding reputation with Checktrade**

The ranking on Checktrade is a huge accolade and endorsement for us. Checktrade independently moderate all reviews, meaning we have no control over what our customer say about our pre-sales and installations, therefore, to rank so highly and see so many great reviews lets us know that we're committed to doing an outstanding job, on every project!

- **Envable reputation, dedicated and committed to customer care**

We are with you every step of the project so you can expect to receive a personal friendly service. We will always pick up the phone and at any point of the project you can speak to a member of the GHI team who will be happy to help

- **Extensive industry know-how and experience**

With combined industry experience in excess of over 100 years and an installation portfolio of thousands our specialists can work alongside you to help you choose a style to suit your home

- **Highly trained in-house fitting team**

Our fitting teams are fully trained on all aspects of our products and are fully insured. We also ensure regular re-fresher training sessions to cover any new products that are introduced to the GHI range

- **Highly skilled in-house technical surveyor**

With over 30 years surveying experience you can be rest assured that the knowledge and precision acquired from our surveyor will make your installation run as smooth as possible

- **High quality installations, with minimal disruption and inconvenience**

Our fitting teams understand that your home is really important to you. They will guarantee that the work is carried out to the highest standard and during the fitting process will ensure minimum disruption wherever possible, tidying up along the way

- **High customer referral and recommendation rating**

We are extremely proud that the majority of our business comes from customer referrals and recommendations. We pride ourselves on our enviable reputation, dedication and commitment to customer care and value our customers saying great things about us!

- **Outstanding service irrespective of order size or value**

No matter how small the project we always ensure all customers are treated with the utmost care and professionalism, at all times

- **FREE quotation service, no obligation, no pressure**

We guarantee that our advisors will never pressure you when visiting our stylish showrooms or out-stay their welcome when invited into your home. They will only recommend products that are suitable for your property and budget and they even take their shoes off without being asked!

Our state-of-the-art visual quotation service enables you to see the clear cost of all products, guaranteeing that there are no hidden extras or last minute nasty surprises. It's the perfect

technology solution to design your window and door configuration and help you choose from a range of different materials and finishes, at the touch of a button

- **Historic conservation know-how**

We carry a wide range of conservation solutions that comply to Article 4 including the popular Residence Heritage Collection and have extensive experience of working in conservation areas

- **Supplying only the highest quality products from leading industry brands**

We only work with leading brands within the industry, these include: Origin UK, Endurance, The Residence Collection, plus many more!

- **Exclusive and bespoke product solutions not found elsewhere**

We understand that choosing new windows and doors can be quite overwhelming with so many products on the market. That's why we only select and sell products that truly offer you something different, over and above other companies

- **In-house servicing department with dedicated support line**

We understand that sometimes you will need to contact us if a problem arises, to make life easy we have our own in-house servicing department and a dedicated support line

- **Stunning show centres showcasing the latest product lines**

Located in Epsom and Weybridge, Surrey our stylish, up-to-the-minute, show centres can let you see the products in-situ, and browse our extensive range as you wish with no pressure

- **Referral scheme**

Nothing beats a referral from a family member or a friend. As a way of saying thank you we offer up to £100 as part of our referral scheme

- **Flexible payment options**

To make life easy you can pay for your products in 4 easy stages, ask a member of our team for further details
